

# Trauma Informed Child Aware Approaches

***Child Aware Approaches  
Conference 2013***

**Dr Cathy Kezelman, President  
ASCA**

# Unresolved trauma

**Community services work regularly with families, with *care-givers* who are *complex trauma survivors*, as well as with their *children/young people*, many of who have their own history of trauma as well**

Their trauma is

- Common; often compounded; impacts cumulative
- Often not acknowledged, identified or appropriately addressed
- Frequently hidden

***It is not only clients who are affected. Many staff have their own histories of trauma – implications for training and work roles***

# Trauma can be resolved!

ASCA *Practice Guidelines for Treatment of Complex trauma and Trauma Informed Care and Service Delivery*  
[www.asca.org.au/guidelines](http://www.asca.org.au/guidelines)

Insecure' attachment generated by adverse childhood experiences can be converted to `secure' attachment

Transmission of insecure attachment to the next generation is also avoided when parental trauma is resolved :

***These are adults who appear to have had difficult childhoods, but have come to create a coherent narrative. They have made sense of their lives. The children attached to these adults have secure attachments and do well! History is not destiny – if you've come to make sense of your life***

(Siegel, 2003:16)

# Personal well-being – trauma informed

*Most staff in community services are **not trauma informed** i.e. informed and/or trained around traumatic stress, its impacts and/or strategies for working with trauma survivors and families.*

***While `personal` and `professional` are widely contrasted in our culture, personal well-being is important to professional practice, and is crucial to trauma-informed practice.***

# Trauma informed services

Understand vulnerabilities and/or triggers of trauma survivors

- *More supportive and effective*
- *Minimise possibilities for*

**re-traumatisation** for clients

**Vicarious traumatisation**/burnout for staff

(Corinne Henderson & Jenna Bateman. 2010. *A National Strategy for Trauma Informed Care*. Mental Health Coordinating Council)

**DO NO HARM; DOES NOT BLAME SURVIVORS FOR THEIR ATTEMPTS TO  
MANAGE THEIR TRAUMATIC STRESS**

*Trauma training for non-trauma providers is main step in making services trauma informed*

(Moses DJ, Huntington N, D'Ambrosio B. Developing integrated services for women with co-occurring disorders and trauma histories: Lessons from the SAMHSA women with alcohol, drug abuse, and mental health disorders who have histories of violence study. Delmar, NY: Policy Research Associates, Inc. 2004)

# Trauma informed practice

*Trauma-informed practice applies to all staff, paid and unpaid, from front-line, reception and administrative to senior management.*

- Everyone needs buy-in
- New paradigm which affects all aspects of service delivery
- Cultural & philosophical shift

# ASCA Trauma informed Training

2 day flexible package

- 1 day workers
- ½ day volunteers
- ½ day managers

*Training has common elements (may be cross-over for workers/volunteers in some services) as well as those particular to each group.*

# Five key principles

- Safety
- Trustworthiness
- Choice
- Collaboration
- Empowerment

*Application to daily service provision; attuned to cultural diversity*

Fallot R. & Harris, M. (2009) 'Creating Cultures of Trauma-Informed Care (CCTIC): A Self-Assessment and Planning Protocol'. Washington, DC: Community Connections

# Benefits of training

- Help you establish *healthier workplace culture* by fostering workplace conditions conducive to *staff well-being*
- Help more effectively *meet Workplace Health and Safety requirements* – **professional and ethical practice, self-care and risk management**
- Enable you to *build a trauma-informed workforce*
- Provide *benefits to both staff and clients* – **enhances staff and client safety, client health, well-being and satisfaction, improved staff performance and reduced turn-over**
- Is *cost-effective*

# Aim of training

*On completing the training, it was anticipated that participants would be equipped with new **knowledge of trauma-informed principles**, and a **basic capacity to tailor and apply these principles** to the specific context of their organisation and their positions within them.*

# Benefits- evidence

*Trauma-informed integrated services are cost-effective - improved outcomes with no greater cost than standard programming. Providers report greater collaboration with consumers, enhanced skills, greater client self-efficacy.*

*Supervisors report more collaboration within and outside agencies, improved staff morale, fewer negative events, and more effective services.*

(Community Connections. (2002). Trauma and Abuse in the Lives of Homeless Men and Women. Online PowerPoint presentation. Washington, DC: Authors. Retrieved September 3, 2007, from [http://www.pathprogram.samhsa.gov/ppt/Trauma\\_and\\_Homelessness.ppt](http://www.pathprogram.samhsa.gov/ppt/Trauma_and_Homelessness.ppt))

# 4 Pilots sites

Sydney; Perth; Hobart; Launceston –  
Feb/March 2013

## *Attendance*

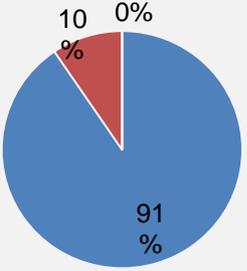

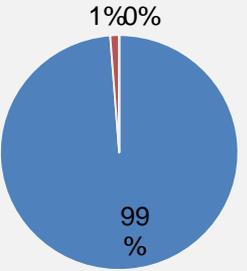

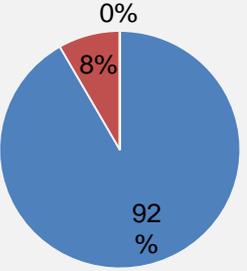

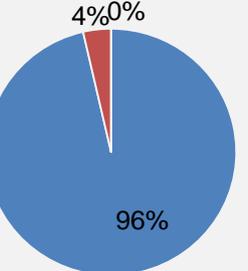

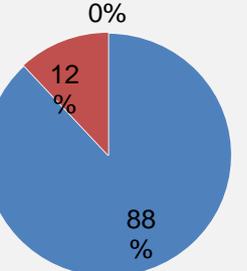

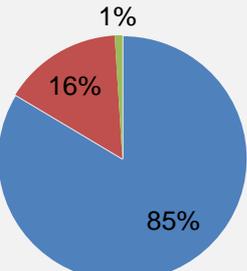

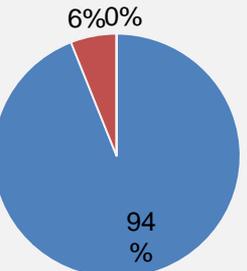

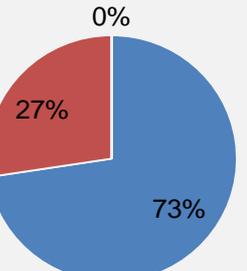

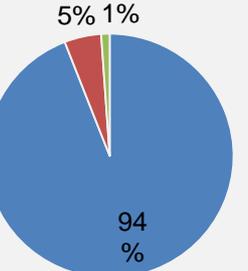

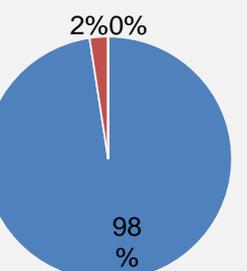

- 100 workers
- 28 volunteers
- 27 managers

## *Questionnaires*

- 84 workers
- 25 volunteers
- 21 managers

# STAFF

## FEEDBACK FORM: TRAUMA-INFORMED TRAINING

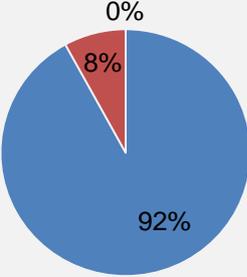

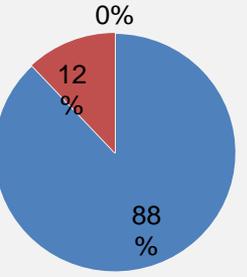

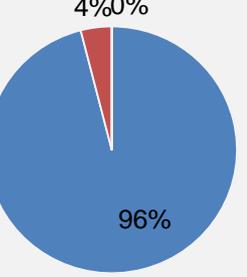

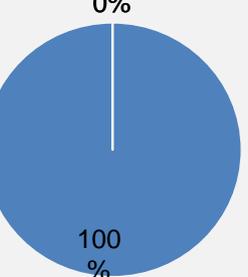

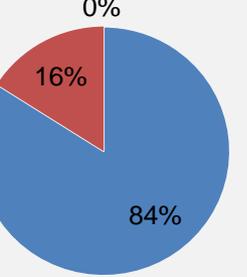

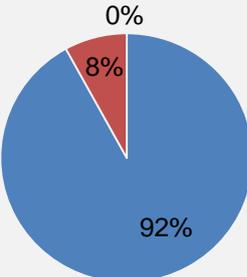

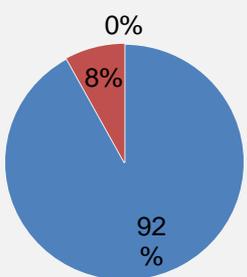

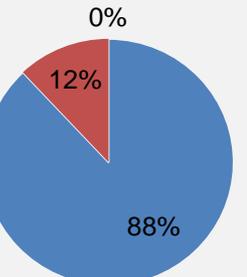

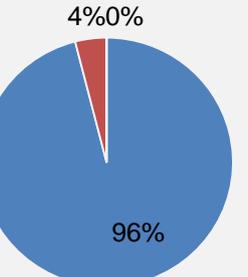

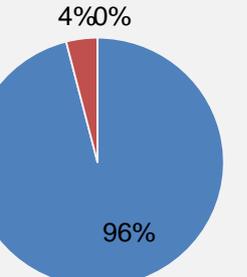

<p>1. The training has prompted me to reflect on the ways in which I work and interact:</p>	<p>2. The <i>reasons</i> for trauma-informed practice are clear to me:</p>	<p>3. The <i>principles</i> of trauma-informed practice (i.e. <i>safety, trust, choice, collaboration &amp; empowerment</i>) are clear to me:</p>	<p>4. The <i>benefits</i> of trauma-informed practice to <i>both</i> clients <i>and</i> staff are clear to me:</p>	<p>5. I understand why basic knowledge of the brain and the effects of stress on the brain assists both my own well-being and my interactions with clients:</p>																																								
 <table border="1"> <tr><th>Response</th><th>Percentage</th></tr> <tr><td>Yes</td><td>91%</td></tr> <tr><td>Unsure</td><td>10%</td></tr> <tr><td>No</td><td>0%</td></tr> </table>	Response	Percentage	Yes	91%	Unsure	10%	No	0%	 <table border="1"> <tr><th>Response</th><th>Percentage</th></tr> <tr><td>Yes</td><td>99%</td></tr> <tr><td>Unsure</td><td>1%</td></tr> <tr><td>No</td><td>0%</td></tr> </table>	Response	Percentage	Yes	99%	Unsure	1%	No	0%	 <table border="1"> <tr><th>Response</th><th>Percentage</th></tr> <tr><td>Yes</td><td>92%</td></tr> <tr><td>Unsure</td><td>8%</td></tr> <tr><td>No</td><td>0%</td></tr> </table>	Response	Percentage	Yes	92%	Unsure	8%	No	0%	 <table border="1"> <tr><th>Response</th><th>Percentage</th></tr> <tr><td>Yes</td><td>96%</td></tr> <tr><td>Unsure</td><td>4%</td></tr> <tr><td>No</td><td>0%</td></tr> </table>	Response	Percentage	Yes	96%	Unsure	4%	No	0%	 <table border="1"> <tr><th>Response</th><th>Percentage</th></tr> <tr><td>Yes</td><td>88%</td></tr> <tr><td>Unsure</td><td>12%</td></tr> <tr><td>No</td><td>0%</td></tr> </table>	Response	Percentage	Yes	88%	Unsure	12%	No	0%

# MANAGERS

## FEEDBACK FORM: TRAUMA-INFORMED TRAINING

<p>1. The reasons for introducing trauma-informed practice to the community services sector are clear to me:</p>	<p>2. The <i>benefits</i> of embedding trauma-informed principles (i.e. <i>safety, trustworthiness, choice, collaboration &amp; empowerment</i>) within my service culture are clear to me:</p>	<p>3. The importance of introducing and embedding trauma-informed principles <i>across all aspects of service-delivery</i> is clear to me:</p>	<p>4. The <i>relationship between trauma-informed practice, OH&amp;S and risk-management</i> (in terms of both staff and client well-being) is clear to me:</p>	<p>5. The proposed steps of 'how to begin' introducing trauma-informed practice to my service are helpful to me:</p>
<p>6. Consideration of both <i>formal</i> and <i>informal</i> aspects of service-delivery assists recognition of the different contexts in which trauma-informed practice needs to operate:</p>	<p>7. Recognising challenging behaviour in terms of <i>trauma-related coping mechanisms</i> is a perspective I am confident to promote in my staff:</p>	<p>8. The relationship between staff conduct and well-being for client <i>interactions</i> is key to trauma-informed practice. How confident are you that you can foster workplace conditions which are conducive to staff well-being?</p>	<p>9. As a manager, your own 'way of being' impacts staff both directly and indirectly. To what extent does basic knowledge of the brain and the effects of stress assist your own well-being and strategies for self-care?</p>	<p>10. The suggested '4 step process' for introducing and monitoring trauma-informed practice in my service is helpful to me:</p>

<b>LEGEND</b>	Yes	Unsure	No
---------------	-----	--------	----

# Workers

## *Pre-training:*

- > **50%** of workers had **heard of trauma informed care**
- >**1/3** some **prior knowledge**. The remainder were unsure as to whether they'd heard of it or not.

## *Post-training:*

- **99%** of workers could see the **benefits of trauma informed care**
- > **90%** felt **training had helped them reflect on their work and interactions with clients.**
- > **96%** clear about **benefits of trauma informed practice for staff and clients**
- **92%** were **clear about principles of trauma informed practice.**

# Volunteers

## *Pre-training*

- **<1/3** they had heard of **trauma informed care**; ½ weren't sure if they had. 20% had not heard of it
- **15%** indicated **prior knowledge** of trauma informed care; 45% no knowledge; 40% being unsure

## *Post training*

- **96%** were clear about **principles of trauma informed practice**; 4% unsure
- **100%** saw **benefits of TICP** for staff and clients.
- **96%** would keep thinking about how they could **implement trauma informed principles into practice.**

# Managers

## *Pre-training*

- **58% had heard of trauma informed care; 33% hadn't; rest unsure.**
- **45.8% had prior knowledge of trauma informed principles, 45.8% didn't; rest unsure.**

## *Post-training*

- **100% clear about benefits of introducing trauma informed care into their service**
- **100% clear about importance of introducing and embedding trauma-informed principles *across all aspects of service-delivery.***

# Strategy for national roll-out

*The purpose of developing a strategy for the training across the sector is to introduce **key themes and principles** of trauma-informed practice, to the **diverse range of services and roles within them** to which they need to be applied.*

# Aims National Roll-out

- Introduce **concept of trauma-informed care and practice** to community services sector and **build awareness** around importance of trauma informed service delivery
- Disseminate **key themes**, **trauma informed principles** and **resources** for **integration** into **policy**, **systems** and **service delivery cultures**
- **Build trauma informed capacity** of community services sector workforce, attuned to particular needs of the sector, which recognizes the diversity of the sector, systems, services, roles and client needs.
- To **facilitate** the **implementation** of **trauma informed principles into practice** within a **wide range** of **organisations** and **services** within the community service sector.

# Recommendations (1)

## Support strategies for systemic reform

- *Embed ASCA Practice Guidelines* as standards
- *Embed* trauma informed care and practice **principles into policy.**
- *Facilitate integration* of trauma-informed philosophy and practice **all levels of service delivery/practice.**
- *Invest* in workforce development, education and training
- *Support* research
- *Support* national trauma informed **agenda** within and across all health and human service sectors; collaboration/information sharing (**National Frameworks/ plans**)

# Recommendations (2)

- **Promote** education trauma informed principles within sector
- **Embed** trauma informed practice in policy, systems and services
- **Build** trauma informed capacity of sector workforce
- **Optimise** sector engagement
- **Optimise** organizational engagement
- **Build** organizational resources (separate to training materials)
- **Identify** funding requirements and enable provision of same
